

Will you be our new CLOUD & IOT SUPPORT professional in our growing IoT & Big Data Company?

Agriculture is the sector to profit from **Internet of Things and Big Data!** And IoT&Big Data are the foundation of the Porphyrio business. Our solutions handle & streamline data coming from livestock operations worldwide. We give **INSIGHT** in these data via a BI Dashboard.

Porphyrio is a business that is strongly international: we are active in 15 countries and on all continents. We are looking to strengthen our growing Belgian based (region Leuven, 20km from Brussels) team, that is at the very root of the Smart Farm Assistant and its functioning.

Who are we looking for?

We are looking for an enthusiastic person with a dynamic mindset and a hands-on, pro-active team player – at Porphyrio we work hard and play hard.

Preferred profile:

- Passionate IT professional
- Knowledge about networking protocols, the Cloud in all its aspects (Azure, Amazon...), command line coding, scripting
- Experience with Web Services
- Passionate about delivering top services to customers & users
- Pro-active approach in automating internal processes
- A real team player, driven by self-learning
- You are hands-on: you take initiative and are happy to bring new ideas into a developing company
- We would like you to start ASAP

What are we offering?

A challenging position in a young, dynamic and growing company which is in the middle of Agritech/Cloud/Big Data movement, with ample possibilities to grow together with the company. We offer you a competitive salary, based on experience and results, the necessary technical tools for you to do your work and extra-legal advantages such as meal vouchers, health care, group insurance, eco vouchers.

Who is Porphyrio?

Porphyrio is a **KU Leuven University spin-off** coming from the **Bioscience Engineering** department. Founded in 2013, Porphyrio is taking up a protagonist role in the digital revolution of the livestock production sector. Technologies such as Big Data ICT & IoT, will play an important role in one of the biggest challenges we are facing in this world: feed 9-10 billion people by 2050!

Our Cloud Based solution – Smart Farm Assistant – enables modern poultry producers worldwide to get total control over their production. By means of Big Data technologies and advanced bio-statistical techniques, we turn the large amounts of production data into relevant management information and complete insight in their production. As such, the Smart Farm Assistant contributes to a sustainable production of food – with respect to the welfare of the farmers, welfare and health of the animals, the environment and natural resources.

Some more info – Porphyrio is part of a two prestigious EU projects (click image for more info!):

Information & Application

If you are enthusiastic about this opportunity send us your application now to info@porphyrio.com or call Kristof Mertens at +32 496 927 246 if you want additional information.
