

What came first: the chicken or the egg? The only thing that matters is the end result.

Evonik Porphyrion is a KU Leuven University spin-off coming from the Bioscience Engineering department. Founded in 2013, Porphyrion takes up a protagonist role in the digital revolution of the livestock production sector. Since 2018, Porphyrion is part of the Evonik Group. Technologies such as Big Data ICT & IoT, will play an important role in one of the biggest challenges we are facing in this world: feeding 9-10 billion people by 2050!

For our office in Leuven (Belgium) we are currently searching for a (m/f)

DATA ENGINEER

What can you expect?

Agriculture is THE sector to profit from Internet of Things and Big Data! And IoT & Big Data are the foundation of the Evonik Porphyrion business. Our solutions handle and streamline data coming from livestock operations worldwide. We give INSIGHT in these data via a BI Dashboard. So, do you want to join a team in which you will make a difference? Be part of the design, the development and the DevOps of solutions? Work agile with IoT innovations, build data pipelines in Python on AWS, and use the latest cutting-edge DevOps tools like Ansible & Docker.

Leuven is a young and vibrant university city located about 30 minutes from Brussels. Enjoy the beautiful old town with its numerous cafés and restaurants alongside plenty of opportunities to spend your evenings and get to know very open-minded and kind people!

Who are we looking for?

- 5 years of relevant experience in software development, solution engineering, technical consulting; with expertise in architecting and rolling out new technology and solution initiatives.
- Excellent coding skills (especially Python, but also Java, C/C++, ...) and a deep knowledge of databases
- Good understanding of cloud possibilities and limitations in the areas of distributed systems, load balancing and networking, massive data storage and security
- Able to build software applications from scratch: analysis of business needs and translation into functional requirements, design, planning, implementation and deployment of the software application
- Highly proficient in spoken and written English
- Able to mentor and give technical advice and direction if needed
- A real team player, enthusiastic with a startup mindset
- You are hands-on: you take initiative and are happy to bring new ideas into a developing company

Additional skills

- Active in the open source community.
- Experience with Agile software development and continuous integration.

What are we offering?

A challenging and key position in a young, dynamic and growing company which is in the middle of Cloud/Big Data/AI revolution in the Agrisector, with ample possibilities to develop yourself with the company. We offer you a competitive salary, based on experience and results, the necessary technical tools for you to do your work and extra-legal advantages such as meal vouchers, health care, group insurance, eco vouchers.
