

For our office in Leuven (Belgium)  
we are currently searching for a (m/f)

## Functional Analyst

### WHAT CAN YOU EXPECT?

As a Functional Analyst you will define and document requirements in co-operation with the different Product Owners and other design team members.

Specifically, you will understand the product on a functional level by understanding the business drivers of our clients and then translating that understanding into requirements to drive solution design in line with the product roadmaps.

The Functional Analysts will be the bridge between the business and the development domain.

### WHO ARE WE LOOKING FOR?

- A passionate technology enthusiast
- Someone who can analyze and understand complex issues on an abstract level
- Someone who can bring structure in places where there is none
- Someone who can look for solutions at an architectural level
- Someone who has experience in analysis and process modelling
- Capability to communicate fluently in English

### ADDITIONAL SKILLS:

- Basis understanding & experience of programming
- Experience in entity and data modelling
- Understanding of livestock farming
- Experience with Agile software development and continuous integration

---
