

For our office in Leuven (Belgium)
we are currently searching for a (m/f)

Java Expert

ROLES & RESPONSIBILITIES

We are looking for an enthusiastic and dedicated team player who's up for a new challenge in a great team and an exciting industry. Someone who can help us improve our current applications and bring them to the next level. As a member of the Back-End team you will help to make the current API future-proof by focusing on performance and by moving to a micro-service architecture. So, do you want to join a team in which you can make a difference?

HARD SKILLS

- You are a skilled Java Developer with at least 5 years experience
- Experienced with frameworks like Spring and Spring Boot
- Experienced in designing REST APIs
- Practical knowledge in both SQL and NoSQL databases
- Familiar with Cloud solutions like AWS
- Familiar with technologies like Docker, Kubernetes, and git
- Able to setup CI/CD pipelines in Jenkins
- Fluent in English, both spoken and written

SOFT SKILLS

- You are analytical and you have a problem-solving attitude
- You are an active contributor in a motivated and growing team
- You have a positive mindset and you are result-driven

Enthusiastic when you read about this opportunity?
