

For our office in Leuven (Belgium)  
we are currently searching for a (m/f)

## Technical Analyst

### WHAT CAN YOU EXPECT?

As a Technical Analyst, you will be responsible of ensuring that our development teams can be effective in delivering an error-free product within time and budget constraints.

You will investigate the technical and architectural impact of new products and designs.

Key tasks would be to maintain a full integration diagram of all applications and to create and maintain functional & technical documentation on existing and new solutions. Furthermore, it will be your task to validate and document security requirements for all solutions.

### WHO ARE WE LOOKING FOR?

- A passionate technology enthusiast with at least 3 years of experience within a development environment
- Good understanding of cloud possibilities and limitations in the areas of distributed systems, load balancing and networking, massive data storage and security
- At least basic understanding & experience in programming
- Experience with databases and transactions
- Capability to communicate fluently in English
- Capability to work with a multidisciplinary and multicultural team

### ADDITIONAL SKILLS:

- Experience in entity and data modelling
- Understanding of livestock farming
