

What came first: the chicken or the egg? The only thing that matters is the end result.

Evonik Porphyrio is a KU Leuven University spin-off coming from the Bioscience Engineering department. Founded in 2013, Porphyrio takes up a protagonist role in the digital revolution of the livestock production sector. Since 2018, Porphyrio is part of the Evonik Group. Technologies such as Big Data ICT & IoT, will play an important role in one of the biggest challenges we are facing in this world: feeding 9-10 billion people by 2050!

For our office in Leuven (Belgium) we are currently searching for a (m/f)

FRONT-END APPLICATION DEVELOPER

What can you expect?

Agriculture is THE sector to profit from Internet of Things and Big Data! And IoT & Big Data are the foundation of the Evonik Porphyrio business. Our solutions handle and streamline data coming from livestock operations worldwide. We give INSIGHT in these data via a BI Dashboard. So, do you want to join a team in which you will make a difference? Be part of the design, the development and the DevOps of solutions? Work agile with IoT innovations and build apps for the web and for mobile using the latest technologies. Your expertise in choosing the right tool will count in a small, solution driven team.

Leuven is a young and vibrant university city located about 30 minutes from Brussels. Enjoy the beautiful old town with its numerous cafés and restaurants alongside plenty of opportunities to spend your evenings and get to know very open-minded and kind people!

Who are we looking for?

- Passionate about software development; excellent coding skills (especially vanilla JavaScript, TypeScript, HTML, CSS and Sass), able to build software applications from scratch with vanilla JS and a deep knowledge of API architectures.
- Proficient knowledge of Web Standards (old & new) and multi browser support, legacy browsers included.
- Professional programming experience with standard Javascript frameworks (AngularJs, Angular, Vue, React).
- Professional experience with Git and NPM.
- Professional experience with front end unit and E2E testing libraries (Jest, Enzyme, Jasmine, Karma, Protractor).
- Proficient knowledge of the principles of Mobile first, Responsive design, PWA and Progressive enhancements.
- Professional experience with Web Services, REST API's.
- Familiar with functional React and React Hooks.
- Familiar with Design Patterns and Component Based Design.
- 5 years of relevant experience in software development, solution engineering, technical consulting; with expertise in architecting and rolling out new technology and solution initiatives.
- Able to build software applications from scratch: analysis of business needs and translation into functional requirements, design, planning, implementation and deployment of the software application.
- Highly proficient in spoken and written English.
- Experience with Agile software development and continuous integration.
- Able to mentor and give technical advice and direction if needed.
- A real team player: you take initiative and are happy to bring new ideas into a developing company.

Additional skills

- Familiar with basic concepts of UI/UX design.
- Familiar with GraphQL.
- Knowledge of DevOps tools like Jenkins, Artifactory, Firebase, Sonar, Ansible, Docker, Vagrant and ECS.
- Knowledge of Atlassian tooling: JIRA, Confluence, BitBucket).
- Active in the open source community.
- Good understanding of cloud possibilities and limitations in the areas of distributed systems, load balancing and networking, massive data storage and security. Knowledge of AWS is a pro.

What are we offering?

A challenging and key position in a young, dynamic and growing company which is in the middle of Cloud/Big Data/AI revolution in the Agrisector, with ample possibilities to develop yourself with the company. We offer you a competitive salary, based on experience and results, the necessary technical tools for you to do your work and extra-legal advantages such as meal vouchers, health care, group insurance, eco vouchers.
