

What came first: the chicken or the egg? The only thing that matters is the end result.

Evonik Porphyrio is a KU Leuven University spin-off coming from the Bioscience Engineering department. Founded in 2013, Porphyrio takes up a protagonist role in the digital revolution of the livestock production sector. Since 2018, Porphyrio is part of the Evonik Group. Technologies such as Big Data ICT & IoT, will play an important role in one of the biggest challenges we are facing in this world: feeding 9-10 billion people by 2050!

For our office in Leuven (Belgium) we are currently searching for a (m/f)

JAVA EXPERT

What can you expect?

Agriculture is THE sector to profit from Internet of Things and Big Data! And IoT & Big Data are the foundation of the Evonik Porphyrio business. Our solutions handle and streamline data coming from livestock operations worldwide. We give INSIGHT in these data via a BI Dashboard. So, do you want to join a team in which you can make a difference; Be part of the design, development and DevOps; Work Agile with IoT innovations, build Java micro-services on AWS, use frameworks like Spring and Maven and cutting-edge DevOps tools like Kubernetes, Docker and Ansible?

Leuven is a young and vibrant university city located about 30 minutes from Brussels. Enjoy the beautiful old town with its numerous cafés and restaurants alongside plenty of opportunities to spend your evenings and get to know very open-minded and kind people!

Who are we looking for?

- A passionate developer with at least 5 years of experience as a Java Developer.
- Practical knowledge of the following technologies: Spring, Hibernate, Web Services, Maven.
- Excellent knowledge about SQL and NoSQL databases.
- Able to build software applications from scratch: analysis of business needs and translation into functional requirements, design, planning, implementation and deployment of the API backend.
- Capability to communicate fluently in Dutch & English.
- Enthusiastic and a real team player.

Additional skills

- Experience with Agile software development and continuous integration.
- Able to mentor and give technical advice and direction if needed.
- Good understanding of cloud possibilities and limitations in the areas of distributed systems, load balancing and networking, massive data storage and security.

What are we offering?

A challenging and key position in a young, dynamic and growing company which is in the middle of Cloud/Big Data/AI revolution in the Agrisector, with ample possibilities to develop yourself with the company. We offer you a competitive salary, based on experience and results, the necessary technical tools for you to do your work and extra-legal advantages such as meal vouchers, health care, group insurance, eco vouchers.

Enthusiastic when you read about this opportunity?
